

Cookies

In order to provide for a due operation of this website, from time to time we may store small data files, known as cookies, on your device. Most major websites do this.

What are cookies?

Cookies are small text files stored by the website on your device during browsing. These files enable the website to store information on your steps and preferences over a certain period of time and if you visit the website the next time, you don't fill these in repeatedly.

How do we use cookies?

We use diverse cookies to operate our websites.

Category	Description
Google Analytics	Google Analytics is an analytics tool helping us understand, how website visitors are using our websites. We may use a set of cookie files and gather information and statistical data on the use of websites. The main cookie file used by Google Analytics is the file_ga. Besides creating an overview of the statistics of use of websites, Google Analytics can be, together with several other files, be used to view more relevant advertisements and measure interactions with viewed advertisements. For more information on Google Analytics, visit: https://www.google.com/intl/sk_ALL/analytics/support/index.html
Google Tag Manager	This tool serves as an aggregator of scripts and orders, launched under the new rules. Google Tag Manager itself uses cookies exclusively to identify the website, into which it was entered.
hasContent	Stores information if the visitor granted consent to use cookies.

How to control cookies

You can manage and delete cookies on your device at any time. You can also set you browser not to store cookies. In such anyhow, certain functionalities and settings may not work properly.
